

Company Profile

Who We Are

Enviro-Revolt is a 100% women-owned Level 1 B-BBEE consultancy established in 2018. We specialize in innovative solutions that bridge the gap between environmental sustainability and business strategy. Our expertise in Environmental, Geology, Mining, and Social Advisory services transforms compliance challenges into opportunities for growth, resilience, and environmental stewardship.

We deliver tailored, holistic solutions across all project phases - from Asset Acquisition to Rehabilitation - helping clients align operations with global sustainability frameworks and regulations, while mitigating risks and driving operational excellence.

Strategic Sustainable Solutions

Chart your path with us

“ Your strategic partners at every step in compliance assest and opertaions ”

Every organization is at a different stage in integrating environmental sustainability, managing asset acquisitions, and optimizing operational efficiency. At Enviro-Revolt, we provide tailored solutions to help you progress strategically and sustainably.

Strategic Sustainable Solutions

Our Values

01

02

03

01. SUSTAINABILITY

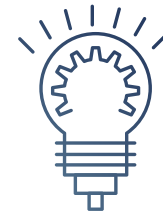

Driving environmental, social, and economic harmony through measurable impact and responsible innovation.

02. STRATEGY

Leveraging cutting-edge insights to optimize operational performance while advancing climate resilience and regenerative solutions.

03. SUCCESS

Building a legacy of environmental integrity, stakeholder trust, and enduring value for our clients.

Strategic Sustainable Solutions

Core Services

1. Asset Acquisition & Sustainability-Focused Due Diligence

- Comprehensive due diligence to assess environmental, regulatory, and operational risks for mining and industrial acquisitions.
- Evaluate environmental, social, and operational risks, ensuring compliance with sustainability benchmarks and ESG criteria.
- Deliver strategic advisory on asset valuation, lifecycle management, and regulatory readiness.

2. Environmental Compliance & Strategy

- Develop and implement sustainable Environmental Management Plans (**EMPs**) and Impact Assessments (**EIAs**).
- Perform regulatory compliance audits to identify and close sustainability gaps (e.g., mining, waste, water use).
- Design stakeholder engagement strategies that prioritize inclusivity and long-term community relationships.

Core Services

3. Water Management and Resource Optimization

- Water Use License Applications (**WULAs**) with integrated resource planning for climate-smart water management.
- Geohydrological studies and water balance assessments to optimize utilization and reduce environmental impact.
- Design closed-loop water systems to enhance efficiency and support net-zero water consumption targets.

4. Waste Management and Resource Optimization

- Pollution prevention and sustainable waste management aligned with circular economy principles.
- Comprehensive landfill and hazardous waste compliance audits to mitigate environmental liabilities.
- Create pollution mitigation plans and strategies for zero-waste goals.
- Manage sustainable landfill operations and waste-to-value initiatives that integrate resource recovery.

Core Services

5. Geological & Geotechnical Solutions

- Provide resource exploration, mineral estimation, and strategic mine planning that aligns with ESG goals.
- Perform geotechnical assessments focusing on long-term stability and climate risk adaptation for infrastructure.
- Leverage advanced modelling technologies to ensure projects align with sustainable development practices.

6. Strategic Sustainability Consulting

- Formulate **ESG** strategies that integrate climate-smart technologies and global reporting standards like **GRI** and **TCFD**.
- Develop decarbonization roadmaps for clients, aligning operations with national and global climate goals.
- Foster continuous improvement through future-ready sustainability frameworks and innovative partnerships.

Our Commitment to Sustainability.

The Heart of Enviro-Revolt

At Enviro-Revolt, environmental sustainability isn't just a goal - it's the foundation of everything we do. We believe that sustainable practices are key to long-term success, not only for businesses but for the ecosystems and communities they touch. Our dedication to sustainability informs every decision, strategy, and solution we offer, ensuring that our clients can thrive while contributing to a healthier planet.

1. Embedding Sustainability into Strategy

We integrate sustainability into every phase of project development, from asset acquisition to operational execution. By aligning business goals with environmental principles, we help clients achieve success while minimizing ecological impact.

Strategic Sustainable Solutions

2. Driving Compliance with Purpose

Our expertise ensures that every project meets and exceeds regulatory requirements. But we go beyond compliance, leveraging it as a stepping stone to innovation and leadership in environmental stewardship.

3. Fostering a Circular Economy

We champion resource efficiency and waste reduction, helping businesses adopt circular economy principles. This approach not only conserves natural resources but also creates opportunities for value recovery and operational savings.

4. Mitigating Climate Risks

Our strategies are designed to address the challenges of a changing climate, from water management to land rehabilitation. By promoting resilience and adaptability, we prepare our clients to navigate an uncertain future with confidence.

Our Value Proposition.

At Enviro-Revolt, we leverage:

Industry Expertise: Combining technical excellence with deep industry insights to deliver impactful, practical solutions.

Innovation: Harnessing the latest technologies and methodologies to address complex challenges.

Integrated Solutions: Offering a seamless approach that connects strategy, operations, and sustainability.

Global Standards: Aligning with global best practices, including ESG, GRI, and ISO frameworks, to build trust and ensure compliance.

Our Recent Projects

1.

Uitkomst Coal Project Asset Acquisition

- Conducted due diligence on pre-existing documentation and licenses, identifying and addressing compliance gaps.
- Conducted pre-feasibility coal exploration, geotechnical assessments, and wetland delineation.
- Ensured compliance with environmental regulations while promoting sustainable resource utilization and ecosystem preservation.

Value: R140 000

Year: 2023

2.

Free State Abattoir Environmental Compliance For Sustainable Operations

- Delivered comprehensive environmental compliance assessments for a new abattoir facility.
- Enabled legal and environmental alignment, ensuring operations remained impact-neutral and met sustainability goals.

Value: R270 000

Duration: 2024 (Ongoing)

3.

Ermelo Opencast Mine Asset Acquisition And Strategic Environmental Solutions

- Assisted with asset acquisition by thoroughly reviewing geological reports and identifying key opportunities and risks.
- Provided technical advisory services, including grade control, survey optimization, and mine planning.
- Ensured the project was aligned with National Regulations and operational efficiency standards.

Value: R380 000

Year: 2023

Strategic Sustainable Solutions

Our Recent Projects

4.

Processing Plant Africa

Sustainable Water And Waste Managements

- Executed Waste Classification and devised sustainable waste management strategies.
- Integrated water and waste solutions to align with ESG principles and enhance resource efficiency by compiling an Integrated Waste and Water Management Plan.

Value: R69 000

Year: 2024

5.

Boldman Colliery

Sustainable Water And Waste Managements

- Conducted due diligence on pre-existing documentation and licenses, identifying and addressing compliance gaps.
- Updated regulatory and technical records to align with current sustainability and operational standards.
- Provided expert recommendations on optimal mining methods and developed strategic operational mine plans for daily activities.

Value: R90 000

Year: 2021

6.

Great Hall

Resilient Infrastructure Design Geotechnical Investigation

- Conducted geotechnical investigations for long-term infrastructure stability.
- Incorporated climate-resilient and environmentally conscious design principles to reduce ecological impact.

Value: R1, 113, 584. 38

Year: 18 months

Strategic Sustainable Solutions

Our Recent Projects

7.

Conservation Building

Conservation-Focused Development
Geotechnical Investigation

- Delivered site-specific geotechnical studies to ensure environmentally sensitive construction.
- Embedded sustainability principles to support conservation efforts and reduce ecosystem disruption.

Value: R271 952

Year: 2024

Strategic Sustainable Solutions

We look forward to **engaging**
with you and exploring
opportunities for collaboration.
